## PROFILE

I'm a results-driven full stack web developer with a passion for problem solving. I excel as an independent, self-driven learner that's not intimidated by new challenges or responsibilities, and I always maintain a curious energy and positive attitude. I have excellent experience working within a team and I highly value organization and attention to detail in my work.

## EXPERIENCE

### EYECUE LABS

*Full-Stack Development Intern* Feb - May 2018

- Worked in a small team to develop full-featured applications from the ground up
- Worked heavily with both front end and back end technologies (including AngularJS, NodeJS/Express, and Postgres)

### EPICODUS CODE SCHOOL

*C#/.NET Track* 2017 - 2018

- 800+ hours of professional pair programming experience
- Learned industry standard frameworks including ASP .NET Core MVC and AngularJS

### GOODWILL INDUSTRIES

*Sales Associate* 2014 - 2017

- Consistently excelled in interpersonal communication
- Discovered security flaw in POS system allowing an attack vector that could bypass any employee's credentials

### RED ROOF INN

*Head Housekeeper* 2012 - 2014

- Managed a team of 6-8 employees in a leadership role

## SKILLS

### PROFICIENCIES

- C# / .NET
- Javascript / TypeScript
- ASP.NET Core MVC
- Angular
- Node.js / Express
- SASS
- HTML5 Canvas
- Unity3D

### FAMILIARITIES

- SQL
- Firebase
- MongoDB

### LEARNING

- GraphQL
- Vue
- React

## PROJECTS

### PSYCHOBABBLE

[github.com/ranefields/psychobabble](https://github.com/ranefields/psychobabble)

- Application built from scratch using Angular, Node/Express, and Postgres
- Features user authentication and several authorization levels
- Required both frontend and backend technologies, and designing an API to connect them

### 4D EXPLORER

[github.com/ranefields/4d-explorer](https://github.com/ranefields/4d-explorer)

- Built using Unity3D
- Explores principles of 4D euclidean geometry in an interactive environment
